Kent --

Tell us how you would invest in transportation: Would you prioritize investments in rail, bus, bike lanes and wider sidewalks, freeway improvements, road repairs? Some or all of these? Depending on where you live and work tell us which of the projects listed in our survey (link is below) you would support. A new transportation funding measure is under discussion and people across LA County are talking about which projects to fund. We are working with LA Metro on formulating the agency's Long Range Transportation Plan — which increases the likelihood that particular projects will get funded — and trying to understand priorities across the county.

[Here's the survey.](#) It should take only 5-10 minutes. Weigh in on the particular projects that are being discussed for funding!
